

Attention all community-based organizations: You are invited to attend

# Building a Solid Foundation for Successful Grant Proposal Writing

## An Introductory Workshop

Sponsored by the **Los Angeles County Department of Public Health Tobacco Control and Prevention Program**  
Presented by the **Pacific Public Health Training Center**

This five-hour introductory training is being offered to all community-based organizations that have never applied for tobacco control funding. This training will discuss the planning and components that go into a well-presented grant proposal, with an emphasis on submitting for federal, state, county, or city funding. Topics include:

- developing core elements of a proposal
- using public data sources to build your case
- identifying and involving strategic partners
- researching grant sources
- program vs. research grant proposals
- tobacco use among priority populations and trends(s) to focus on policy

### Learning Objectives

At the end of this training, participants will be able to:

1. Discuss 3-5 elements that go into a grant proposal.
2. Describe how public data sources can be used in grant proposal writing.
3. Identifying 2 sources for potential funding opportunities.
4. Differentiate between program vs. research grant proposals.

**This training is FREE OF CHARGE.**

**It will be presented on two different dates to maximize your participation.**

**DATES:** First Presentation: Monday, April 12, 2010 **(sorry, this session is full)**  
Second Presentation: Thursday, April 29, 2010 **(sorry, this session is full)**

**TIME:** 10 a.m. – 4 p.m. **(lunch provided)**

**LOCATION:** The California Endowment  
Greater Los Angeles Program Office  
April 12: Cabrillo Room ▪ April 29: Catalina Room  
1000 North Alameda Street  
Los Angeles, CA 90012 [\(click here for directions\)](#)

### ABOUT THE TRAINER

**Michael Prelip, MPH, DPA, CHES, CPH**, is an associate professor in the Department of Community Health Sciences at the UCLA School of Public Health. He is currently involved in a number of community-based research projects that use the community participatory model, and conducts his work in both domestic and international settings. Dr. Prelip recently finished a project with the Los Angeles Unified School District (LAUSD) to develop a process to improve the school and community environment to be more "nutrition friendly." He is the lead evaluator for LAUSD's nutrition education programs and develops evaluation methods to assess impact of school-based nutrition education programs. Dr. Prelip recently started an NIH-funded project with Health Net of California to improve health literacy of adolescents, and two CDC-funded research projects examining collaborations between local health departments, schools, and community- and faith-based organizations for disaster readiness.
